Certified CME Aesthetic Workshop

This activity is jointly provided by Global Education Group and Certified CME LLC.

Target Audience
The educational design of this activity addresses the needs of physicians, nurse practitioners, and nurses (no prerequisites needed) involved in the treatment of patients with aesthetic needs.

Statement of Need/Program Overview
Aesthetics is a regulated field and so are the practitioners within it. This ensures that regulated health care professionals, such as qualified nurses, nurse practitioners, and physicians, are licensed and regulated by an institution that protects the people. These institutions have education standards, **aesthetic medical training,** and medical exams that must be passed for legal practice! It also ensures that the quality of treatment you will receive is high. Being properly trained in aesthetic medical treatments and procedures helps protect the reputation and avoid possible malpractice situations. Even just one incident can ruin the entire reputation so it's crucial to avoid those situations as much as possible. Proper training can prevent this from happening. Aesthetic procedures are medical procedures, and when you pick up a syringe, your patients' health and their appearances are in your hands and that is why our faculty emphasizes that significance of proper aesthetic medical training. The best physicians will always tailor treatments to each patient to ensure that natural-looking results are achieved.

Our mission is to provide honest, trustworthy, professional training courses for clinicians seeking to learn aesthetic medicine with the utmost integrity and free of bias and commercial influence.

Faculty
Faculty will rotate depending on location and date. List of rotating faculty can be found here: https://certifiedcme.com/faculty/

Program Agenda
